

Federation Square Upper Square Screen

Installation of a 4340 wide x 4750 high framed audio visual screen in Federation Square adjacent to the Beer Deluxe tenancy.

Key components of this project included powder coated steel fabrication, installation of AV structural frame, customised perforated facade panels and interactive audio visual screen.

Kane had previously delivered the \$2M [Cloud Canopy](#) project with Fed Square and Maddison Architects in 2013.

Kane thoroughly enjoyed working with the client and the Architect on both of these projects.

The Lump Sum contract was delivered over a 5 week period, reaching practical completion in the first quarter of 2015 in time for the screening of the Australian Open.
