

Health Sciences DAF Laboratory

Kane Property Services was engaged to complete the remodelling of several existing operational government laboratory areas in small stages in order to keep the facility fully operational whilst the work was carried out.

The modification and reconfiguration of the operational PC2 Laboratory space included diversion of existing services, relocation of fume cupboards and installation of new mechanical equipment.

Communication was vital during the refurbishment, to ensure that scientists running numerous experiments throughout the works, were not interrupted or affected by power outages or dust.

The project was completed ahead of schedule by combining some work areas and fast tracking the programme.
