

## All Hallows' School, The Exchange Project

Kane Constructions has been engaged for the Lump Sum contract works of The Exchange Project within the operational campus of the All Hallows' School, along busy Ann Street in the heart of Brisbane's CBD.

The involvement of Kane on this large-scale project will include the extension and refurbishment of an existing four-storey school building. The extension works will include a three-storey structure that will feature a standout 'Drum Stair', and a Cross Laminated Timber (CLT) composite structure. The newly built and refurbished spaces will incorporate a technology hub, multiple reading areas, eight learning areas, staff rooms, meeting and function rooms, roof terraces as well as amenities for students and staff.

The project is the second Kane will have delivered for All Hallows' School at this campus, following the successful delivery of the Aquinas Hall Science Labs & Tuckshop Refurbishment project.

The project is due for completion by the end of 2021.
