

## Austin Health & Rehabilitation Centre

The Health and Rehabilitation Centre (H&RC) at Heidelberg Repatriation Hospital for Austin Health provides an integrated model that encompasses assessment, rehabilitation intervention and education services.

The project includes a hydrotherapy pool and two gymnasiums which are purpose built for community, inpatient and veterans use.

The building is a first stage of a full redevelopment of the site and sits adjacent to a Veterans Centre for Trauma Related Health also constructed by Kane.

Kane Constructions was appointed in 2009 as Construction Manager to deliver the \$12 million project. Works were completed in 2010.
