

Beerwah Social Housing Project

Kane was engaged by Project Urban under a Design & Construct contract to deliver the \$8 million Beerwah Social Housing Project.

The project consists of the construction of 33 units, 17 one bedroom units and 16 two bedroom units. The units are architecturally designed, sympathetic to the Beerwah heritage character and are set over a two storey townhouse format.

The complex provides both communal and private open space for future residents and a dedicated community room on-site with covered dining space, turf area and gardens which will be used for community engagement events, workshops and meetings. This will assist in harnessing tenant interaction and enable residents to enjoy community spirit during their tenancies.

The project is expected to reach Practical Completion in late 2022.
