

Beerwah Social Housing | 33 Units

Kane Constructions was engaged by Project Urban under a Design and Construct contract to deliver the Beerwah Social Housing project, on the Sunshine Coast.

This project included the construction of 33 architecturally designed units, 17 one-bedroom units and 16 two-bedroom units arranged in a two-storey townhouse format, respecting Beerwah's heritage character.

The complex provides both communal and private open spaces for residents, along with a dedicated community room featuring covered dining, a turf area, and gardens. These amenities are designed to support community engagement events, workshops, and meetings, fostering tenant interaction and a strong community spirit.
