

## Il Centro Bar and Awning Works

Kane Constructions was awarded this project in October 2011 following a competitive tender.

The project was for the design and construction of a new riverside bar and awning in the Central Business District, Brisbane.

The new bar and structural awning works were carried out in Eagle Street Pier precinct; a busy restaurant and leisure river centre which, remained fully operational throughout construction.

The new bar was designed to create an intimate space whilst maintaining a relaxed and inviting atmosphere for guests.

All construction activities were undertaken during opening hours to minimise disruption to the centre owners, tenants and the public.
