

La Trobe University Bundoora Clinical Teaching Building

Kane Constructions has been appointed to deliver the design and construction of the new La Trobe University's new Clinical Teaching Building at the Bundoora campus.

This state-of-the-art four-level facility is a key part of La Trobe's \$170 million health innovation investment and will bring together education and clinical services, supporting La Trobe's health innovation strategy and improving access to allied health care for the community.

The building will provide a collaborative space for students and clinical educators across disciplines such as psychology, physiotherapy, occupational therapy, speech pathology, orthoptics, podiatry and audiology.

Designed for student-led services and interdisciplinary learning, the facility will include consultation rooms, specialist treatment areas and dedicated spaces for teaching and collaboration. Kane is proud to contribute to a project that will strengthen health education and deliver lasting community benefit.
