

Loddon Prison Secure Annexe

Expansion of the existing prison located at Castlemaine in regional Victoria.

Completed in mid-2014, the new 236-bed secure annexe is the first stage of the overall \$76 million upgrade and expansion underway at Loddon. The second stage involved an upgrade to the prison's security system.

The Loddon Annexe represents a new type of security classification – restricted minimum – sitting outside the existing prison walls, but with its own secure perimeter.

Kane Constructions was awarded this \$50 million Lump Sum contract in late April 2013 with works completed in June 2014.
