

## Loreto College Coorparoo, Dale Street Precinct

Kane Constructions has commenced work on the recently awarded Loreto College Coorparoo, Dale Street Precinct.

The Design and Construct project features a three-level secondary education facility, including:

- 11 new General Learning Area (GLA) teaching spaces
- Extension to the existing chapel
- Administration offices
- Lecture theatre
- Spacious terrace function area
- Inviting communal landscape courtyards

This pivotal building will serve as a prominent entry and exit point for the school.

The works are being delivered within a tight site boundary adjacent to the operational school and our team is dedicated to careful coordination with both the school and local residents.

Kane is proud to partner with Loreto College and Donald Cant Watts Corke on this transformative educational facility for the students, conceptually designed by Cox Architecture and delivered by Deicke Richards.
