

Maroochy RSL, Club Refurbishment

The Maroochy RSL Club engaged Kane for their extensive refurbishment project in late 2015, which incorporated all amenities areas, a new café, restaurant area, port cochere, main entry and main bar/lounge area.

The project also included the extension of the first floor area and the installation of a contemporary new front façade. The level of finishes is now of a mid to high quality range, producing an attractive modern facility designed to target both valued existing customers as well as new clientele.

The refurbishment was staged to allow the ongoing operation of the Maroochy RSL Club throughout the project's duration. Kane's team is utilising their extensive experience in working within operational environments ensured the safety of the staff and general public throughout the process.

This refurbishment has brought the Maroochy RSL Club into a new era, whilst attracting a greater demographic of people.
