

North Rockhampton Hospitality Trade Training Centre

Kane Constructions was awarded this design and construct project to build a new Hospitality TAFE Training Centre in an existing High School.

The building works consisted of a training kitchen with 15 workstations with ovens, microwaves, sinks, fridges, a fully operational commercial kitchen, restaurant and alfresco area, cafe and bar, courtyard, training room and linked covered walkway.

With the construction zone in the centre of the School grounds Kane had to maintain a daily communication to coordinate with the School's operations.
