

Parramatta East Public School Upgrade, Main Works

Kane Constructions is delivering the significant upgrade of Parramatta East Public School as part of the NSW Government's plan to enhance public education infrastructure across the state.

The project includes construction of a new three-storey building that will accommodate 24 modern teaching spaces, three support learning areas, a library, administration zones and upgraded student and staff amenities.

Existing buildings on the campus will be refurbished to extend their use and improve functionality, while the outdoor environment will be revitalised with upgraded playgrounds, hard and soft landscaping and improved recreation areas.

Additional works include the delivery of a new staff car park, a formalised waste management area, improved pedestrian access and a new kiss-and-ride zone to streamline drop-off and pick-up times.

This redevelopment will provide a flexible and welcoming learning environment designed to meet the needs of both current and future students in the Parramatta East school community.
