

Queensland Ambulance Station, North Lakes

Kane Constructions was awarded a \$2.5m project constructing the largest Ambulance Station in Queensland.

With a plant room for 16 Ambulances, this facility comprises a large concrete tilt panel with 3D patterning. The design was based on environmentally friendly materials, similar to that required by Green Star.

Constructed in the growing suburb of North Lakes, this site has become well recognised and talked about. The site is spread across 5,000m² with administration offices, training rooms, rest rooms and facilities for the Ambulance officers.
