

RACV Royal Pines Children's Pool & Waterpark

Kane were engaged to construct the new Children's Pool and Waterpark for RACV Royal Pines on the back of completing the award winning One Spa at the resort.

The waterpark is located next to the existing pool facilities and features contemporary custom-made play equipment from the USA, as well as a wading pool and spa.

The project team constructed new stone paving and exposed aggregate concrete pathways to create a seamless flow from the original pool area to the new waterpark, and successfully relocated several date palms to various other garden beds within the resort.

Kane delivered an aesthetically pleasing and skillfully built pool and waterpark area for Royal Pines' guests, all whilst ensuring minimal disruption to the maintenance and operation of the existing pool.
