

Springvale Integrated Services Hub

Design and construction of a new \$7 million facility providing an integrated service which incorporates child care, a kindergarten, toy library, maternal and child health, and community-based support services for children and families.

Kane Constructions was engaged by the City of Greater Dandenong in early 2009 to design and construct the 1500m² facility that provides integrated services to 96 children.

Working closely with Williams Ross Architects, the new facility was completed in early 2010 on time and on budget.
