

St Vincent's Hospital Cancer Centre

Kane Constructions was appointed in 2008 under a Lump Sum contract to deliver the \$12 million St Vincent's Cancer Centre and Metropolitan Ambulance Service building.

Located on the first floor of the Daly Wing, the new centre encompasses patient areas including consulting suites and oncology treatment together with a dedicated pharmacy and multidisciplinary conference room.

Designed in close association with the users and patients, the centre aims to create an environment which patients and families feel that their medical, psychological and social needs are being met.

A landscaped courtyard, natural light and materials combine to create a space which is both welcoming, supportive, reflecting the ideas of healing, warmth and comfort.

Access for construction was extremely limited with major works being undertaken adjacent to and on top of occupied patient spaces.
