

Swinburne University Advanced Technologies Centre

Construction of a new 22,000m² state-of-the-art research and learning centre.

The facility is home to resources such as the Brain Sciences Institute, Advanced Molecular and Proteomics Facility and a Strong Structures Laboratory - the only one of its kind in Australia. The building also contains a PC3 laboratory.

The building has been designed with significant sustainable features and has achieved a 5-star Green Star Education rating with the Green Building Council of Australia.

A flagship development for Swinburne University, the Advanced Technology Centre comprises two 12-level towers and two four level buildings clad with white precast panels.

The \$76 million fixed price lump sum contract was awarded to Kane Constructions following a competitive tender.

The Project reached Practical Completion in January 2011. [Watch the video here.](#)
