

## Tumbalong Green Stage Upgrade, Darling Harbour

Located in the heart of Darling Harbour on Sydney's western CBD fringe, Kane Constructions has proudly been awarded the \$8 million Tumbalong Green Stage Upgrade project.

Underpinned by Kane's extensive Cross Laminated Timber (CLT) and community sector experience, Kane is thrilled to partner with Darling Harbour Live to deliver this unique performance space.

Designed by Hassell, the stage will host live concerts, performances, festivals, exhibitions and community events. Once complete, the project will reinvigorate the rich harbourside precinct, providing an overdue functional facility for future entertainment and community engagement.

The scope of work includes:

- Removal of the existing sail roof
- Foundation works
- Construction of a new steel and sustainable laminated glulam timber structure with a membrane roof
- Construction of a raised performance stage
- Installation of two new 9m x 5m HD LED screens
- Replacement of existing fences, and refurbishment of timber cladding
- Supply, install and connection of AV equipment
- Installation of stage lighting electrical
- Installation of acoustic reflected ceiling and cabling works

The project commenced in mid-June 2022 and will be completed in May 2023.
