

## University of Queensland Warehouse Building Refurbishment

Kane Constructions was awarded this project in early 2012 following a competitive tender.

Works include alterations to the existing storage warehouse to include a mezzanine floor with offices, breakout areas, amenities and workshop space for University of Queensland Property and Facilities division. Works also included the refurbishment of existing flood affected offices.

The remaining section of the warehouse and adjacent tenancies including the University mail room, archives and chemical storage remained operational throughout construction. Works were coordinated with all stakeholders to ensure that there was no disruption to University operations.
