

Blum Australia, Showroom & Office Redevelopment

Kane Constructions has been engaged to deliver the upgrade and expansion of Blum Australia's office and showroom facility, supporting the continued growth of its national operations.

The project involves refurbishment and reconfiguration of the existing showroom to create an open, flexible display environment, together with upgrades to office and support areas, construction of enclosed meeting and operational rooms, and associated building services improvements.

Delivered within a live operational facility, the works require detailed staging and coordination to maintain visitor access, parking, truck movements and logistics operations throughout construction.

The redevelopment will provide a contemporary, adaptable workplace and showroom aligned with Blum Australia's evolving operational requirements.
