

Kedron State High School, New Performing Arts Centre (PAC)

Kane Constructions has been awarded the contract for the Design and Construct delivery of the new Performing Arts Centre (PAC) at Kedron State High School, in partnership with the school, the Department of Education, and Donald Cant Watts Corke (DCWC). This project will significantly enhance the school's performing arts facilities, providing a modern and versatile space for students and staff.

Key features of the new PAC include:

- State-of-the-art auditorium with advanced acoustic design
- Professional-grade stage
- Music General Learning Areas (GLA)
- Ensemble rooms designed for creativity and performance excellence
- Staff rooms and amenities to support the facility's operation
- Sleek, contemporary façade that complements the school's heritage, featuring face brick and lightweight cladding

The project is being delivered within a live school environment, with careful coordination to minimise disruption to the school and local community.

Kane is proud to partner with the Department of Education, DCWC, and the project team to deliver a high-quality performing arts facility that will enhance the educational and artistic experience for students at Kedron State High School.
