

Lindfield Village Green

Kane Constructions has recently completed the Design and Construct contract to deliver Lindfield Village Green for Ku-ring-gai Council, with the key anchor tenant for the car park being Transport for NSW.

This exciting project has transformed the existing council-owned car park at Tryon Road, Lindfield, into a vibrant new public space. The village plays a central role in community life for residents, staff, commuters, shoppers and visitors in the area.

Set on a site of approximately 5,350sqm, Lindfield Village Green consists of a striking pavilion building with café and outdoor dining facilities, a public plaza, amenities, dual lifts and stair access to a three-level underground car park with 241 spaces.

Two gazebos shaded by specially selected fast-growing plants and two water features are also part of the Village Green.

The project was designed for social gatherings and easy movement of pedestrians and cyclists to the train station. Now complete, the Village Green will host markets, an outdoor cinema, live music and other performances to enliven the area.

Works commenced on-site in April 2020 and were completed in February 2022.
