

Yirrama Primary School

Kane Constructions has successfully completed the construction of Yirrama Primary School, a vital new educational facility in Geelong.

Delivered for the Victorian School Building Authority, the project comprises a collection of contemporary single-storey buildings, each designed to enhance the learning experience. Specialist facilities support a diverse curriculum, while the gymnasium encourages physical education and wellbeing.

The school also features flexible learning neighbourhoods, a state-of-the-art library, and an administration building providing staff and students with modern, functional spaces. Landscaped outdoor areas and sports courts complete the vibrant campus environment.

Practical completion has been achieved ahead of the 2026 school year, with Yirrama Primary School set to welcome its first students in Term 1.
